Petkim Petrochemicals Inc. one of the most important companies in Turkey. The Petkim Complex consists of 14 production plants and 7 utility plants to supply the production plants. Petrochemical processing has a high energy requirement, especially plants with the complex technology that is used at Petkim Complex. Petkim Integrated Management System consists of 9 sub systems. These are; ISO 9001 Quality Management System, ISO 14001 Environmental Management System, TS 18001 Occupational Health And Safety Management System, ISO 17025 Laboratory Accreditation System, ISO 50001 Energy Management System, TS 10002 Customer Satisfaction Management System, ISO 27001 Information Security Management System, Greenport and TS 31000 Risk Management System.

Energy sector has high competition conditions. Petkim can reach its high level targets with active and effective integrated management system implementations.

2015 revision of ISO 9001 quality management systems standard can be a challenge of companies that reviewing management systems.

In this presentation how Petkim adapted 2015 revision of ISO 9001 will be explained in detail and the feedback of implementations will be given.
