

The development and historical retrospection of Space systems-Closed Loop Problem Solving Management

Zhang tao

*Beijing institute of space long march vehicle,
NO.1 Nan Da Hong Men Road Fengtai District, Beijing, China*

Based on the development of space systems-Closed Loop Problem Solving Management, Surrounding a series of particular events including the putting forward to the concept of systems-closed loop, the solving of technology for systems-closed loop problem, the solving of management for systems-closed loop problem, small probability events of aerospace, the systems-closed loop problem simultaneously solving of technology and management, the new five principles in systems-closed loop problem solving , Completing a comprehensive and systematic review on the development of space systems-closed loop problem solving management and summarized.
